Use of a Visual Migraine Language™ (VML) as part of a new data entry interface that identifies possible migraine triggers and premonitory symptoms

Albert, M., Coates, R.M., Donoghue, S., Boucher, G. & Mian, A. Curelator Inc. Cambridge MA, USA

Introduction
Curelator Headache

VML Drives the Data Entry Interface

Conclusions and discussion

Use of the VML simplifies the user interface, enhances user experience, and encourages speed of use, text has been minimized by use of the novel 'Visual Migraine Language', a complex interaction between an individual's genetics and their personal environment.

Testing

Testing Population and adherence to use:
